Stichting AGCI-NL works to advance knowledge and its use in decision-making to support the achievement of sustainability. Through scientific research, technical assessments, stakeholder partnerships, and the dissemination of findings, the Foundation promotes the understanding of global change science and solutions. Outline of the policy plan

Please answer the questions below or provide an URL to the policy plan after the last question about the policy plan.

The online policy plan should at least provide answers to the questions about the policy plan asked here.

Stichting AGCI-NL's strategy centres on strengthening the scientific basis for public and private decision-making related to climate change, sustainability, and global environmental challenges. Key activities include:

Conducting and supporting research and technical assessments on the physical, ecological, and social dimensions of global change.

Making research actionable by developing decision support tools, stakeholder partnerships, and communities of practice.

Organising events and forums to foster cross-sector dialogue and engagement.

Collaborating with institutions, civil society, governments, and other partners to amplify impact and develop shared strategies.

Engaging in non-partisan advocacy to promote the integration of scientific evidence into policy making.

Financially supporting charitable organisations aligned with its mission.

The Foundation remains adaptable and innovative, ensuring its approaches reflect the latest scientific insights and evolving societal needs.

The capital of the Foundation is constituted by institutional grants, individual donations, corporate sponsorships and partnerships and online fundraising and campaigns. The foundation will only accept the proceeds of a will by means of beneficiary acceptance. All funds received shall be directed exclusively toward achieving the Foundation's objects, with full transparency and accountability to donors and stakeholders.
